ELSEVIER

Comput. Methods Appl. Mech. Engrg. 138 (1996) 349

Computer methods in applied mechanics and engineering

Contents Volume 138

Volume 138, Nos. 1–4, 1 December, 1996

Publisher's note 1

A study of fragmentation processes using a discrete element method
F. Kun and H.J. Herrmann 3

Semi-analytical finite elements in the higher-order theory of beams
J. Argyris and R. Kačianauskas 19

Computerized design, generation and simulation of meshing and contact of worm-gear drives with improved geometry
I.H. Seol and F.L. Litvin 73

Mixed finite element formulations and related limitation principles: a general treatment
G. Alfano and F. Marotti de Sciarra 105

Combined steady-state nonlinear heat transfer/thermal postbuckling computations in unstiffened and stiffened laminated composite plates and shells
J. Argyris and L. Tenek 131

Modeling and sensitivity analysis of multibody systems using new solid, shell and beam elements
T.M. Wasfy and A.K. Noor 187

Computerized determination of gear tooth surface as envelope to two parameter family of surfaces
F.L. Litvin and I.H. Seol 213

The Prolonged Adaptive Multigrid method for finite element Navier–Stokes equations
S.Ø. Wille 227

Hierarchical modeling of heterogeneous bodies
T.I. Zohdi, J.T. Oden and G.J. Rodin 273

A new Korn's type inequality for thin domains and its application to iterative methods
E.E. Ovtchinnikov and L.S. Xanthis 299

A posteriori error estimation for elasto-plastic problems based on duality theory
S.I. Repin and L.S. Xanthis 317
